CAREER OBJECTIVE

Full Stack Developer experienced in building end-to-end web applications with React, Next.js, and Node.js/Express, backed by MongoDB and PostgreSQL. Delivered production platforms like NeelNir (e-commerce with order tracking & admin panel), TravelEase, and Digital Life Lessons combining clean UI/UX with scalable, secure backend architecture.

TECHNICAL & SOFT SKILLS

Languages: JavaScript, TypeScript
Frontend: React.js, Next.js (App Router), Tailwind CSS, Shadcn/ui, Redux Toolkit, TanStack Query, React Hook Form, Axios
Backend: Node.js, Express.js, MongoDB, PostgreSQL, Prisma ORM, JWT, REST API
Tools & Deployment: Git, GitHub, Vercel, Render, Postman
Soft Skills: Collaboration, Adaptability, Problem Solving, Time Management, Effective Communication

Projects

Digital Life Lessons (December 2025 - December 2025) **Live | Client | Server**

knowledge-sharing platform allowing users to create, categorize, and monetize life insights. Implemented secure payment gateways and role-based access control to distinguish between free and premium content, ensuring a scalable and sustainable ecosystem.

- **Freemium Ecosystem:** Integrated **Stripe** for secure subscription payments and implemented role-based access control (RBAC) to dynamically blur premium content for free users, ensuring a seamless upgrade transition.
- **Interactive Dashboards:** Designed role-specific dashboards featuring data visualization for user activity tracking and administrative tools for content moderation, enabling efficient platform management.
- **Advanced Discovery:** Improved browsing performance with server-side pagination, multi-criteria filtering (Category/Tone), and real-time social features (reactions/favorites) using **TanStack Query**.

NeelNir (June 2026 - present) **Live | Client | server**

A full-featured e-commerce platform built with Next.js and TypeScript for a fashion brand, featuring a bilingual (Bangla/English) storefront, real-time order tracking, and an admin panel for product and order management.

- **Order Tracking System:** Built a real-time shipment tracking flow where customers enter an order ID to view a live progress timeline (Placed, Processing, Shipped, In Transit, Delivered) alongside order details and total amount.
- **Admin Panel:** Developed an admin dashboard for managing products, categories, and orders with secure CRUD operations, powering the storefront's collections and inventory.
- **Product Discovery:** Implemented live search with instant autocomplete suggestions, advanced shop filtering (category, price range, color), and a curated collections page across 10+ categories.

Travelease (November 2025 - November 2025) **Live | Client | server**

Built a vehicle rental platform with wishlist functionality, theme persistence, and smooth UI/UX. Implemented dynamic filtering, real-time sorting, and state management using **Redux Toolkit** and **Axios**, enhancing responsiveness and user experience.

- **User-Friendly Interface**: The sleek, user-friendly app offers a seamless shopping experience, enabling easy browsing, selection, and purchasing of products.
- **Dynamic Filtering & Sorting:** Engineered advanced vehicle filtering (category/location) and real-time price sorting, utilizing Redux Toolkit for state management and Axios for instant API data handling.
- **Real-Time Booking:** Implemented real-time booking updates and client-server synchronization using Redux, ensuring instant reflection of availability and status changes.

Education

Shahadowla Government College | B.Sc (Honours) in Botany | 2025 – Present

Language

Bangla (Native) | **English** (Fluent) | **Hindi** (Conversational)
